DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3-6, 8-11, 13-17, 21-32, 35-42, and 45, drawn to a graphical interface with customized control objects, classified in class 345, subclass 866.
- II. Claims 18-20, 33 and 34, drawn to controlling a music player via a device driver for an optical diskette burner, classified in class 709, subclass 321.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility in that it can be used without customized graphical interfaces. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant's representative, Eric Nelson, could not be reached by telephone on the 8th or 9th of January 2004. Therefore an election to the above restriction requirement was not made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
